KLZU runway and wind diagram. Schematic: alignment only. Magnetic north is up. Runway length, width, relative position and intersections are not drawn and are not published in the runway table. Land runways drawn: 07/25. Wind from 040 degrees true, 046 degrees magnetic, at 13 knots gusting 25 knots. Wind direction is the direction the wind blows FROM, so the arrow starts on the upwind side of the field and points across it. Wind-favoured runway end, highlighted: 07. Wind source: KLZU METAR 052133Z.

Evidence & limitations

- METAR source state: ok; observed Sep 5 17:33 ET; retrieved Sep 5 18:57 ET; 84 min before this run.
- Measured values read from the KLZU METAR. This is a current surface observation only; it is not a forecast.
- Only fields decoded from this METAR are shown; every missing field remains unavailable.
- Altimeter: 29.89 inHg.

- Raw METAR: SPECI KLZU 052133Z 04013G25KT 10SM VCTS CLR 33/20 A2989 RMK A02 LTG DSNT NW-NE TSB27 \$
- The runway schematic is alignment-only; verify current runway use and NOTAMs.

- METAR
- TAF
- NWS-hr
- NWS-day
- MAV
- MEX
- GFA
- NOTAM

METAR – issued hourly. The NWS issues a SPECI report if conditions change significantly. Issued by the National Weather Service, not a forecast. KLZU observations describe current conditions.

TAF – highest confidence forecast. The NWS issues a TAF every 6 hours. Issued by the National Weather Service, not a forecast. KLZU observations describe current conditions.

NWS hour – Weather Service hourly forecast. The NWS issues a 3-hourly forecast every 6 hours. Issued by the National Weather Service, not a forecast. KLZU observations describe current conditions.

NWS day/night – Weather Service day and night forecast. The NWS issues a 12-hourly forecast every 6 hours. Issued by the National Weather Service, not a forecast. KLZU observations describe current conditions.

GFS Model – Global Forecasting System. The NWS uses the GFS to produce its forecasts. Issued by the National Weather Service, not a forecast. KLZU observations describe current conditions.

GFS ensemble – Global Forecasting System ensemble. The NWS uses the GFS ensemble to produce its forecasts. Issued by the National Weather Service, not a forecast. KLZU observations describe current conditions.

GFA and NOTAM – GFA and NOTAM. The NWS uses GFA and NOTAM to provide flight information. Issued by the National Weather Service, not a forecast. KLZU observations describe current conditions.

FAA NOTAM (NMS) — Notices to Air Missions: closures, outages, obstacles and TFRs, issued continuously by the FAA and valid until cancelled. On this page they are advisory evidence about the airport, not weather, and they never change a flight category. The NOTAM query failed this run (state: AUTH_ERROR), so the NOTAM list is unknown rather than empty.

SHORT TERM

..
(This evening through Sunday)
Issued at 359 PM EDT Sat Sep 5 2026

Heat Concerns Continue:

Current satellite loop shows scattered clouds developing across the area with some showers and thunderstorms across North and Central GA.
Very warm temps continue across the area with highs expected in the middle to upper 90s through the short term. With dewpoints in the 70s we can expect to see Heat Index values in the 103 to 109 deg range Today and Sunday. Have extended the heat advisory to include Sunday which should be our last day of these extreme temps (at least through the next 7 days).

Severe Thunderstorms Possible This Weekend:

The Bermuda ridge that kept us mostly dry for most of this past week is finally weakening as the next frontal boundary nears the area from the NE. This weakening ridge is allowing typical scattered summertime pop-up showers and storms to develop across central GA, where moisture has pooled and subsidence from the fleeting ridge is lower. The second area for storms is across north/northeast GA associated with increased moisture ahead of the approaching cold front which is pushing SW down the eastern seaboard and should move into NE GA between 12z-18z Sun. Scattered strong to severe storms are possible, with the primary threat being damaging wind gusts, and frequent lightning strikes. SPC has the aforementioned corridor of north/northeast GA in a Marginal Risk (Level 1 of 5) for severe weather with a Severe Thunderstorm watch just N and E of our area across portions of the Carolinas.

On Sunday, convective activity will ramp up even more, as a shortwave and associated frontal boundary start to move across the area. This forcing, combined with the warm and humid airmass in place out ahead of it, will support scattered to numerous afternoon showers and storms, with generally higher coverage across central GA. Several storms may be strong to severe, with damaging wind gusts, and frequent lightning strikes as the primary threats. The greatest risk for severe storms will be across portions of east and Central GA, where SPC has a Slight Risk (Level 2 of 5) for severe weather. With the potential for repeated rounds of storms and efficient rainfall rates, we'll also have to watch out for localized flash flooding, especially in urban and poor-drainage areas.

LONG TERM

..
(Monday morning through next Friday)
Issued at 359 PM EDT Sat Sep 5 2026

By Monday and the start of the long term, mid-level ridging situated across the midsection of the country will begin migrating eastward. Chances for showers and thunderstorms will largely be focused along the front (which may slow down or speed up as we approach the short term), the best of which (60-80%) appear to be across the far southeastern portion of the forecast area. Sensible effects of the front will be fairly substantial given the preceding heat, with highs as much as 8-10 degrees "cooler" (relatively speaking) than Sunday -- in the lower 80s to lower 90s. Portions of northeast Georgia at elevation may even remain in the 70s. Expect further fine tuning of Monday's temperatures as they're directly tied to frontal progress.

Tuesday and beyond, the core of the aforementioned mid-level ridging will move overhead, accompanied by high pressure at the surface -- oriented such that we're likely to have an extended period of "cold" air damming. Heat will begin to build once again, with highs returning to several degrees above average by mid-to-late week. Breezy easterly winds should support ample mixing during the afternoon, which will initially serve to keep heat index values within a few degrees of air temperatures. Widespread convective development will be hampered by subsidence, with rain chances

relegated largely to portions of south central Georgia through Wednesday.

The presiding mid-level ridge will retrograde westward across the Four Corners region on Thursday, allowing for more substantial moisture intrusion across the Southeast, and a return to more uniform afternoon thunderstorm chances areawide.

Area Forecast Discussion
National Weather Service Peachtree City GA
425 PM EDT Sat Sep 5 2026

...Afternoon Area Forecast Discussion...

.KEY MESSAGES...

- Well above normal temperatures this weekend with heat index values in the triple digits. A Heat Advisory is in effect across most of north and central Georgia through Sunday evening.

- Scattered afternoon and evening thunderstorms will be around this weekend. A few storms may be severe.

- Cooler and drier weather moves in early next week, with temperatures warming back to above normal by mid-week.

&&

KSAV runway and wind diagram. Schematic: alignment only. Magnetic north is up. Runway length, width, relative position and intersections are not drawn and are not published in the runway table. Land runways drawn: 10/28, 01/19. Wind from 270 degrees true, 277 degrees magnetic, at 9 knots. Wind direction is the direction the wind blows FROM, so the arrow starts on the upwind side of the field and points across it. Wind-favoured runway end, highlighted: 28. Wind source: KSAV METAR 052153Z.

Evidence & limitations

- METAR source state: ok; observed Sep 5 17:53 ET; retrieved Sep 5 18:57 ET; 64 min before this run.
- Measured values read from the KSAV METAR. This is a current surface observation only; it is not a forecast.
- Only fields decoded from this METAR are shown; every missing field remains unavailable.
- Altimeter: 29.85 inHg.
- The complete raw METAR remains in this airport's Raw products disclosure.
- The runway schematic is alignment-only; verify current runway use and NOTAMs.

Wind direction

KMYR runway and wind diagram. Schematic: alignment only. Magnetic north is up. Runway length, width, relative position and intersections are not drawn and are not published in the runway table. Land runways drawn: 18/36. Wind from 190 degrees true, 199 degrees magnetic, at 14 knots. Wind direction is the direction the wind blows FROM, so the arrow starts on the upwind side of the field and points across it. Wind-favoured runway end, highlighted: 18. Wind source: KMYR METAR 052153Z.

Evidence & limitations

- METAR source state: ok; observed Sep 5 17:53 ET; retrieved Sep 5 18:57 ET; 64 min before this run.
- Measured values read from the KMYR METAR. This is a current surface observation only; it is not a forecast.
- Only fields decoded from this METAR are shown; every missing field remains unavailable.
- Altimeter: 29.81 inHg.
- The complete raw METAR remains in this airport's Raw products disclosure.
- The runway schematic is alignment-only; verify current runway use and NOTAMs.

KHxD runway and wind diagram. Schematic: alignment only. Magnetic north is up. Runway length, width, relative position and intersections are not drawn and are not published in the runway table. Land runways drawn: 03/21. Wind from 200 degrees true, 208 degrees magnetic, at 4 knots gusting 12 knots. Wind direction is the direction the wind blows FROM, so the arrow starts on the upwind side of the field and points across it. Wind-favoured runway end, highlighted: 21. Wind source: KHxD METAR 052150Z.

Evidence & limitations

- METAR source state: ok; observed Sep 5 17:50 ET; retrieved Sep 5 18:57 ET; 67 min before this run.
- Measured values read from the KHxD METAR. This is a current surface observation only; it is not a forecast.
- Only fields decoded from this METAR are shown; every missing field remains unavailable.
- Altimeter: 29.87 inHg.
- The complete raw METAR remains in this airport's Raw products disclosure.
- The runway schematic is alignment-only; verify current runway use and NOTAMs.

Wind from 300° true, 309° magnetic

KROA runway and wind diagram. Schematic: alignment only. Magnetic north is up. Runway length, width, relative position and intersections are not drawn and are not published in the runway table. Land runways drawn: 06/24, 16/34. Wind from 300 degrees true, 309 degrees magnetic, at 4 knots. Wind direction is the direction the wind blows FROM, so the arrow starts on the upwind side of the field and points across it. Wind-favoured runway end, highlighted: 34. Wind source: KROA METAR 052154Z.

Evidence & limitations

- METAR source state: ok; observed Sep 5 17:54 ET; retrieved Sep 5 18:57 ET; 63 min before this run.
- Measured values read from the KROA METAR. This is a current surface observation only; it is not a forecast.
- Only fields decoded from this METAR are shown; every missing field remains unavailable.
- Altimeter: 29.89 inHg.
- The complete raw METAR remains in this airport's Raw products disclosure.
- The runway schematic is alignment-only; verify current runway use and NOTAMs.

KSGJ runway and wind diagram. Schematic: alignment only. Magnetic north is up. Runway length, width, relative position and intersections are not drawn and are not published in the runway table. Land runways drawn: 13/31, 06/24, 02/20. Seaplane water lanes (17W, 35W, 18W, 36W, 12W and 30W) are excluded from the diagram and are never marked as favoured. Wind from 230 degrees true, 237 degrees magnetic, at 4 knots. Wind direction is the direction the wind blows FROM, so the arrow starts on the upwind side of the field and points across it. Wind-favoured runway end, highlighted: 24. Wind source: KSGJ METAR 052156Z.

Evidence & limitations

- METAR source state: ok; observed Sep 5 17:56 ET; retrieved Sep 5 18:57 ET; 61 min before this run.
- Measured values read from the KSGJ METAR. This is a current surface observation only; it is not a forecast.
- Only fields decoded from this METAR are shown; every missing field remains unavailable.
- Altimeter: 29.90 inHg.
- The complete raw METAR remains in this airport's Raw products disclosure.
- The runway schematic is alignment-only; verify current runway use and NOTAMs.

KCRG METAR 052153Z

KCRG runway and wind diagram. Schematic: alignment only. Magnetic north is up. Runway length, width, relative position and intersections are not drawn and are not published in the runway table. Land runways drawn: 14/32, 05/23. Wind from 170 degrees true, 177 degrees magnetic, at 7 knots. Wind direction is the direction the wind blows FROM, so the arrow starts on the upwind side of the field and points across it. Wind-favoured runway end, highlighted: 14. Wind source: KCRG METAR 052153Z.

Evidence & limitations

- METAR source state: ok; observed Sep 5 17:53 ET; retrieved Sep 5 18:57 ET; 64 min before this run.
- Measured values read from the KCRG METAR. This is a current surface observation only; it is not a forecast.
- Only fields decoded from this METAR are shown; every missing field remains unavailable.
- Altimeter: 29.88 inHg.
- The complete raw METAR remains in this airport's Raw products disclosure.

• The runway schematic is alignment-only; verify current runway use and NOTAMs.

KFIN runway and wind diagram. Schematic: alignment only. Magnetic north is up. Runway length, width, relative position and intersections are not drawn and are not published in the runway table. Land runways drawn: 11/29, 06/24. Seaplane water lanes (18W and 36W) are excluded from the diagram and are never marked as favoured. Wind from 180 degrees true, 187 degrees magnetic, at 5 knots. Wind direction is the direction the wind blows FROM, so the arrow starts on the upwind side of the field and points across it. Wind-favoured runway end, highlighted: 24. Wind source: KFIN METAR 052150Z.

Evidence & limitations

- METAR source state: ok; observed Sep 5 17:50 ET; retrieved Sep 5 18:57 ET; 67 min before this run.
- Measured values read from the KFIN METAR. This is a current surface observation only; it is not a forecast.
- Only fields decoded from this METAR are shown; every missing field remains unavailable.
- Altimeter: 29.90 inHg.
- The complete raw METAR remains in this airport's Raw products disclosure.
- The runway schematic is alignment-only; verify current runway use and NOTAMs.

Wind speed: 4 kt

KECP runway and wind diagram. Schematic: alignment only. Magnetic north is up. Runway length, width, relative position and intersections are not drawn and are not published in the runway table. Land runways drawn: 16/34. Wind from 180 degrees true, 183 degrees magnetic, at 4 knots. Wind direction is the direction the wind blows FROM, so the arrow starts on the upwind side of the field and points across it. Wind-favoured runway end, highlighted: 16. Wind source: KECP METAR 052153Z.

Evidence & limitations

- METAR source state: ok; observed Sep 5 17:53 ET; retrieved Sep 5 18:57 ET; 64 min before this run.
- Measured values read from the KECP METAR. This is a current surface observation only; it is not a forecast.
- Only fields decoded from this METAR are shown; every missing field remains unavailable.
- Altimeter: 29.89 inHg.
- The complete raw METAR remains in this airport's Raw products disclosure.
- The runway schematic is alignment-only; verify current runway use and NOTAMs.

KPNS runway and wind diagram. Schematic: alignment only. Magnetic north is up. Runway length, width, relative position and intersections are not drawn and are not published in the runway table. Land runways drawn: 17/35, 08/26. Wind from 230 degrees true, 232 degrees magnetic, at 9 knots. Wind direction is the direction the wind blows FROM, so the arrow starts on the upwind side of the field and points across it. Wind-favoured runway end, highlighted: 26. Wind source: KPNS METAR 052153Z.

Evidence & limitations

- METAR source state: ok; observed Sep 5 17:53 ET; retrieved Sep 5 18:57 ET; 64 min before this run.
- Measured values read from the KPNS METAR. This is a current surface observation only; it is not a forecast.
- Only fields decoded from this METAR are shown; every missing field remains unavailable.
- Altimeter: 29.88 inHg.
- The complete raw METAR remains in this airport's Raw products disclosure.
- The runway schematic is alignment-only; verify current runway use and NOTAMs.

KJKA runway and wind diagram. Schematic: alignment only. Magnetic north is up. Runway length, width, relative position and intersections are not drawn and are not published in the runway table. Land runways drawn: 09/27, 17/35. Wind from 250 degrees true, 252 degrees magnetic, at 6 knots. Wind direction is the direction the wind blows FROM, so the arrow starts on the upwind side of the field and points across it. Wind-favoured runway end, highlighted: 27. Wind source: KJKA METAR 052159Z.

Evidence & limitations

- METAR source state: ok; observed Sep 5 17:59 ET; retrieved Sep 5 18:57 ET; 58 min before this run.
- Measured values read from the KJKA METAR. This is a current surface observation only; it is not a forecast.
- Only fields decoded from this METAR are shown; every missing field remains unavailable.
- Altimeter: 29.87 inHg.
- The complete raw METAR remains in this airport's Raw products disclosure.
- The runway schematic is alignment-only; verify current runway use and NOTAMs.

KBFM runway and wind diagram. Schematic: alignment only. Magnetic north is up. Runway length, width, relative position and intersections are not drawn and are not published in the runway table. Land runways drawn: 14/32, 18/36. Wind from 180 degrees true, 182 degrees magnetic, at 4 knots. Wind direction is the direction the wind blows FROM, so the arrow starts on the upwind side of the field and points across it. Wind-favoured runway end, highlighted: 18. Wind source: KBFM METAR 052124Z.

Evidence & limitations

- METAR source state: ok; observed Sep 5 17:24 ET; retrieved Sep 5 18:57 ET; 93 min before this run.
- Measured values read from the KBFM METAR. This is a current surface observation only; it is not a forecast.
- Only fields decoded from this METAR are shown; every missing field remains unavailable.
- Altimeter: 29.90 inHg.
- The complete raw METAR remains in this airport's Raw products disclosure.
- The runway schematic is alignment-only; verify current runway use and NOTAMs.

▲ Wind direction 270°

KTPF runway and wind diagram. Schematic: alignment only. Magnetic north is up. Runway length, width, relative position and intersections are not drawn and are not published in the runway table. Land runways drawn: 04/22, 18/36. Wind from 270 degrees true, 276 degrees magnetic, at 7 knots. Wind direction is the direction the wind blows FROM, so the arrow starts on the upwind side of the field and points across it. Wind-favoured runway end, highlighted: 22. Wind source: KTPF METAR 052115Z.

Evidence & limitations

- METAR source state: ok; observed Sep 5 17:15 ET; retrieved Sep 5 18:57 ET; 102 min before this run.
- Measured values read from the KTPF METAR. This is a current surface observation only; it is not a forecast.
- Only fields decoded from this METAR are shown; every missing field remains unavailable.
- Altimeter: 29.88 inHg.
- The complete raw METAR remains in this airport's Raw products disclosure.
- The runway schematic is alignment-only; verify current runway use and NOTAMs.

Wind direction is the direction the wind blows FROM, so the arrow starts on the upwind side of the field and points across it. Wind-favoured runway end, highlighted: 32. Wind source: KSRQ METAR 052153Z.

Evidence & limitations

- METAR source state: ok; observed Sep 5 17:53 ET; retrieved Sep 5 18:57 ET; 64 min before this run.
- Measured values read from the KSRQ METAR. This is a current surface observation only; it is not a forecast.
- Only fields decoded from this METAR are shown; every missing field remains unavailable.
- Altimeter: 29.91 inHg.
- The complete raw METAR remains in this airport's Raw products disclosure.
- The runway schematic is alignment-only; verify current runway use and NOTAMs.

3 · Where

Timeline unavailable; verify an official briefing.

last attempt 22:58 Z (state: AUTH_ERROR)

AUTH_ERROR) — advisory only; verify an official briefing.

+ NOTAM DETAILS

FAA NMS: PRODUCTION SOURCE (OWNER-APPROVED)

Source provenance — FAA NMS: Production status is unknown; verify an official briefing.

Source provenance — FAA NMS: Production source per owner decision 2026-08-09; technical transport environment remains preprod. Limited 2026-07-30 spot check covered KLZU, KAVL, and KSGJ (3 of 30 airports). The query failed this run, so the NOTAM list here is unknown rather than

METAR — the routine surface observation issued hourly by the reporting station, with

TAF — the Terminal Aerodrome Forecast, the highest-resolution aviation forecast available.

GFS MOS (MAV) — Model Output Statistics, the GFS model bias-corrected against

GFS extended MOS (MEX) — the extended-range MOS product, issued twice a day in

GFA and prog charts — the Graphical Forecast for Aviation and the Weather

FAA NOTAM (NMS) — Notices to Air Missions: closures, outages, obstacles and TFRs, issued continuously by the FAA and valid until cancelled. On this page they are advisory evidence about the airport, not weather, and they never change a flight category. The NOTAM query failed this run (state: AUTH_ERROR), so the NOTAM list is unknown rather than empty.

period and is shown in the dropdown with its issuing office and valid time. It is displayed, never interpreted.

KVNC runway and wind diagram. Schematic: alignment only. Magnetic north is up. Runway length, width, relative position and intersections are not drawn and are not published in the runway table. Land runways drawn: 13/31, 05/23. Wind from 300 degrees true, 306 degrees magnetic, at 8 knots. Wind direction is the direction the wind blows FROM, so the arrow starts on the upwind side of the field and points across it. Wind-favoured runway end, highlighted: 31. Wind source: KVNC METAR 052115Z.

Evidence & limitations

- METAR source state: ok; observed Sep 5 17:15 ET; retrieved Sep 5 18:57 ET; 102 min before this run.
- Measured values read from the KVNC METAR. This is a current surface observation only; it is not a forecast.
- Only fields decoded from this METAR are shown; every missing field remains unavailable.
- Altimeter: 29.90 inHg.
- The complete raw METAR remains in this airport's Raw products disclosure.
- The runway schematic is alignment-only; verify current runway use and NOTAMs.

KOPF runway and wind diagram. Schematic: alignment only. Magnetic north is up. Runway length, width, relative position and intersections are not drawn and are not published in the runway table. Land runways drawn: 09L/27R, 12/30, 09R/27L. Wind from 310 degrees true, 317 degrees magnetic, at 8 knots. Wind direction is the direction the wind blows FROM, so the arrow starts on the upwind side of the field and points across it. Wind-favoured runway end, highlighted: 30. Wind source: KOPF METAR 052150Z.

Evidence & limitations

- METAR source state: ok; observed Sep 5 17:50 ET; retrieved Sep 5 18:57 ET; 67 min before this run.
- Measured values read from the KOPF METAR. This is a current surface observation only; it is not a forecast.
- Only fields decoded from this METAR are shown; every missing field remains unavailable.
- Altimeter: 29.92 inHg.
- The complete raw METAR remains in this airport's Raw products disclosure.
- The runway schematic is alignment-only; verify current runway use and NOTAMs.

+ NOTAMs

NOTAMs

FAA NMS: PRODUCTION SOURCE (OWNER-APPROVED)

NOTAM auth failure (AUTH_ERROR)

FAA NMS: PRODUCTION SOURCE (OWNER-APPROVED)

Source provenance — FAA NMS: Production source per owner decision 2026-08-09; technical transport environment remains preprod. Limited 2026-07-30 spot check covered KLZU, KAVL, and KSGJ (3 of 30 airports). The query failed this run, so the NOTAM list here is unknown rather than empty. Typed state: AUTH_ERROR. The dot colour reports whether this source was read this run; technical environment: preprod.

2 · What

3 · Where

+ NOTAM DETAILS

FAA NMS: PRODUCTION SOURCE (OWNER-APPROVED)

Source provenance — FAA NMS: Production status is unknown; verify an official briefing.

Source provenance — FAA NMS: Production source per owner decision 2026-08-09; technical transport environment remains preprod. Limited 2026-07-30 spot check covered KLZU, KAVL, and KSGJ (3 of 30 airports). The query failed this run, so the NOTAM list here is unknown rather than

METAR — the routine surface observation issued hourly by the reporting station, with

TAF — the Terminal Aerodrome Forecast, the highest-resolution aviation forecast available.

GFS MOS (MAV) — Model Output Statistics, the GFS model bias-corrected against

GFS extended MOS (MEX) — the extended-range MOS product, issued twice a day in

GFA and prog charts — the Graphical Forecast for Aviation and the Weather

FAA NOTAM (NMS) — Notices to Air Missions: closures, outages, obstacles and TFRs, issued continuously by the FAA and valid until cancelled. On this page they are advisory evidence about the airport, not weather, and they never change a flight category. The NOTAM query failed this run (state: AUTH_ERROR), so the NOTAM list is unknown rather than empty.

period and is shown in the dropdown with its issuing office and valid time. It is displayed, never interpreted.

KHPN runway and wind diagram. Schematic: alignment only. Magnetic north is up. Runway length, width, relative position and intersections are not drawn and are not published in the runway table. Land runways drawn: 16/34, 11/29. Wind from 330 degrees true, 343 degrees magnetic, at 5 knots. Wind direction is the direction the wind blows FROM, so the arrow starts on the upwind side of the field and points across it. Wind-favoured runway end, highlighted: 34. Wind source: KHPN METAR 052156Z.

Evidence & limitations

- METAR source state: ok; observed Sep 5 17:56 ET; retrieved Sep 5 18:57 ET; 61 min before this run.
- Measured values read from the KHPN METAR. This is a current surface observation only; it is not a forecast.
- Only fields decoded from this METAR are shown; every missing field remains unavailable.
- Altimeter: 29.84 inHg.
- The complete raw METAR remains in this airport's Raw products disclosure.
- The runway schematic is alignment-only; verify current runway use and NOTAMs.

- Extended outlook and hazard-feed states are reported in the source stamp.
- Runway data + Chart Supplement — FAA Chart Supplement (current cycle) — see AirNav link above

3 · Hazard feeds & regional observations

Unfiltered hazard feeds (not route-geometry screened): 23 SIGMET records, 25 G-AIRMET records, 7 CWA records. Regional current observations (not corridor forecasts): no adverse or unknown current categories identified.

Scope: Hazard counts are raw feed totals and have not been filtered against a proposed route, altitude, or time. Airport flight categories are current point observations, not corridor forecasts.

4 · Planning gates

- **Evidence gate:** an unavailable, stale, or out-of-horizon source is unknown — never treat it as favorable.
- **Weather gate:** compare current observations and valid-period forecasts with personal ceiling, visibility, convection, wind, and crosswind minimums.
- **Route gate:** screen the actual route, altitude, and time against official hazard products; feed totals on this page are not route-filtered.
- **Operations gate:** verify NOTAMs, TFRs, runway conditions, fuel, aircraft performance, daylight, and alternates.

5 · ForeFlight manual cross-check (before flight)

- Official briefing matches these go/no-go windows
- Prog charts / radar / satellite trend agrees with convection timing
- Winds & temps aloft along actual route (may shift ETE)
- **NOTAMs & TFRs** — airport-scoped NMS records may be shown, but route-wide/TFR coverage is not included; pull a fresh official briefing for departure, destination, and alternates
- Runway condition / length / closures at destination & alternate
- Weight & balance + performance at forecast density altitude (heat!)
- File & brief in ForeFlight; confirm fuel stops if long-range

6 · Source stamp

Show source stamp and evidence inventory

KLZU METAR excerpt: SPECI KLZU 052133Z 04013. AWC METAR state OK for 30/30 airports; TAF target coverage for 0/30; MOS fetch health GFS 30/30, MEX 30/30; target coverage 60/90 airport-days; planned-window board coverage 3/3; combined target forecast coverage for 0/30; FAA status known for 0/30. Hazard feeds: state=ok; SIGMET=23, G-AIRMET=25, CWA=7; counts are unfiltered and are not a route assessment.
NWS AFD state: ok · FAA NMS NOTAM states: AUTH_ERROR=30; normalized records=0; unnormalized records=0; environment=preprod; sandbox-public-preview=true · Fuel: best-effort (verify) · FAA chart cycle: VFR Sectional Ed. 98 (eff. 09/03/2026); Chart Supplement Ed. 5 (eff. 09/03/2026).

Executive summary

DETERMINISTIC · RESTATES PAGE EVIDENCE · NO MODEL CALLED

A plain restatement of evidence shown in full below, computed from that evidence with no model call. It reports what the sources say; it does not rank the days, rate them, or make a go/no-go call. It follows the order the owner asked for: feasibility evidence, KLZU, destinations, weather by area or region, then new KLZU NOTAMs.

1 · Feasibility evidence for the trip window

This part is a derivation, not an observation: it states how much of the trip window carries a forecast flight category, and nothing more. It is not a go/no-go call, not a recommendation, and not a flight category. Its inputs and its gaps are listed in the tooltip on the line below.

- Trip window: Fri Sep 4 – Mon Sep 7, 2026. “This weekend” is taken to mean exactly this window; no other date range is assessed.
- Trip-window feasibility evidence (Derived): assessable for every active trip day — 3 of 3 active trip days in Fri Sep 4 – Mon Sep 7, 2026 carry a forecast flight category and 0 carry none. This is a derived statement about how much evidence exists, it is not a flight category, and it says nothing about whether a flight is advisable. Every input and every gap is named in this line's tooltip.

2 · KLZU home-base status

The KLZU observation and the per-day board categories, taken from the same helpers the board itself renders from, so the two cannot disagree.

- KLZU current observation: VFR — from the surface observation read this run; it describes conditions now, not a trip day.
- Sat Sep 5, 18:00–22:00 ET: VFR — most restrictive forecast flight category; medium confidence; from MOS.
- Sun Sep 6, 06:00–22:00 ET: VFR — most restrictive forecast flight category; medium confidence; from MOS.
- Mon Sep 7, 06:00–22:00 ET: MVFR — most restrictive forecast flight category; medium confidence; from MOS.
- A forecast flight category is available for 3 of 3 active trip days; 0 reach no category-capable product at this lead time.
- Data quality: DEGRADED — as reported by the badge in the page header; it gates publication, it is not a weather statement.

3 · Destination coverage

Coverage, not a pick: this counts which destinations a product permitted to state a flight category actually reaches. It is not a ranking, not a recommendation, and the editorial order of the destination list is not a flyability score.

- Destinations: 29 of 29 covered airports resolve a forecast flight category on at least one active trip day; 0 resolve none at this lead time. Counted from the same per-day outlook the destination cards render, with outlook-grade blocks excluded.
- Most restrictive resolved category per covered airport, across the active trip days: KAVL LIFR (3/3 d), KBED VFR (3/3 d), KBFM MVFR (3/3 d), KCRE IFR (3/3 d), KCRG MVFR (3/3 d), KDAB VFR (3/3 d), KECF VFR (3/3 d), KFIN VFR (3/3 d), KGKT MVFR (3/3 d), KGPT MVFR (3/3 d), KHPN MVFR (3/3 d), KHSA MVFR (3/3 d); 17 further airports in section 2.
- NOTAMs: no destination of 29 reports an active NOTAM this run; 29 destination NOTAM queries did not complete. KLZU departure NOTAM state: AUTH_ERROR.

4 · Weather events by area or region

Weather events by area or region, from products that carry an area. Per-airport categories are never clustered into a region here: an area inferred that way would be a spatial claim no source made.

- 55 hazard areas retained with their own coordinate rings. Each is related to an airport only by point-in-polygon (ray casting) against the product's own coordinate ring, or by great-circle distance from the airport to the nearest point on the product's boundary within 100 NM — tested against 30 airports that reported a position this run. No area name is inferred: the only names stated are the ones a product supplies itself. Per-airport categories are never clustered into a region.
- 55 of 55 retained hazard areas are valid at some point inside the planned trip window; the rest describe conditions before it.
- G-AIRMET SIERRA — IFR: contains KMYR, KCRE (point-in-polygon (ray casting) against the product's own coordinate ring); boundary within 100 NM of KJZI 48 NM, KHXD 89 NM. valid 2026-09-05 21:52Z to 2026-09-06 03:00Z.
- G-AIRMET SIERRA — MT_OBSC: contains KSHD (point-in-polygon (ray casting) against the product's own coordinate ring); boundary within 100 NM of KROA 21 NM. valid 2026-09-05 21:52Z to 2026-09-06 03:00Z.
- SIGMET 24E — CONVECTIVE: contains KMYR, KCRE (point-in-polygon (ray casting) against the product's own coordinate ring); boundary within 100 NM of KJZI 15 NM, KLZU 34 NM, KHXD 40 NM, KSAV 43 NM, KAVL 83 NM. valid 2026-09-05 22:55Z to 2026-09-06 00:55Z.
- SIGMET 45C — CONVECTIVE: contains KNEW (point-in-polygon (ray casting) against the product's own coordinate ring); boundary within 100 NM of KHSA 10 NM, KGPT 29 NM, KBFM 83 NM, KJKA 99 NM. valid 2026-09-05 22:55Z to 2026-09-06 00:55Z.
- SIGMET 27E — CONVECTIVE: contains KSHD (point-in-polygon (ray casting) against the product's own coordinate ring); boundary within 100 NM of KROA 60 NM. valid 2026-09-05 22:55Z to 2026-09-06 00:55Z.
- SIGMET 28E — CONVECTIVE: contains KFIN, KDAB, KOPF (point-in-polygon (ray casting) against the product's own coordinate ring); boundary within 100 NM of KSGJ 8 NM, KVNC 30 NM, KTPF 32 NM, KCRG 32 NM, KSRQ 37 NM, KSPG 41 NM, KSSI 71 NM. valid 2026-09-05 22:55Z to 2026-09-06 00:55Z.
- SIGMET 30E — CONVECTIVE: contains KLZU (point-in-polygon (ray casting) against the product's own coordinate ring); boundary within 100 NM of KGKT 82 NM, KAVL 96 NM, KSAV 100 NM. valid 2026-09-05 22:55Z to 2026-09-06 00:55Z.
- CWA 206 — TS over ZHU (Houston): boundary within 100 NM of KBFM 4 NM, KGPT 22 NM, KJKA 27 NM, KPNS 34 NM, KHSA 41 NM, KNEW 76 NM. valid 2026-09-05 21:59Z to 2026-09-05 23:00Z.
- CWA 302 — TS over ZMA (Miami): boundary within 100 NM of KOPF 86 NM. valid 2026-09-05 22:01Z to 2026-09-05 23:05Z.
- G-AIRMET ZULU — FZLVL: boundary within 100 NM of KLZU 88 NM; published as a line, not an enclosed area, so no containment test is made against it. valid 2026-09-05 20:45Z to 2026-09-06 03:00Z.
- G-AIRMET ZULU — FZLVL: boundary within 100 NM of KMYR 13 NM, KOPF 17 NM, KCRE 23 NM, KDAB 40 NM, KSAV 48 NM, KFIN 50 NM, KJZI 51 NM, KSSI 60 NM, KBFM 61 NM, KSGJ 61 NM, KLZU 63 NM, KECF 70 NM, KPNS 71 NM, KHXD 74 NM, KGPT 75 NM, KCRG 77 NM, KJKA 81 NM, KVNC 83 NM, KHSA 84 NM, KTPF 87 NM, KSRQ 87 NM, KSPG 93 NM; published as a line, not an enclosed area, so no containment test is made against it. valid 2026-09-05 20:45Z to 2026-09-06 03:00Z.
- G-AIRMET ZULU — FZLVL: boundary within 100 NM of KJKA 70 NM, KPNS 84 NM, KBFM 89 NM, KGPT 89 NM, KHSA 97 NM, KNEW 99 NM; published as a line, not an enclosed area, so no containment test is made against it. valid 2026-09-05 20:45Z to 2026-09-06 03:00Z.
- G-AIRMET ZULU — FZLVL: boundary within 100 NM of KHPN 39 NM; published as a line, not an enclosed area, so no containment test is made against it. valid 2026-09-05 20:45Z to 2026-09-06 03:00Z.

- SIGMET 23E — CONVECTIVE: boundary within 100 NM of KOPF 84 NM. valid 2026-09-05 22:55Z to 2026-09-06 00:55Z.
- SIGMET 25E — CONVECTIVE: boundary within 100 NM of KGKT 1 NM, KTRI 35 NM, KAVL 38 NM. valid 2026-09-05 22:55Z to 2026-09-06 00:55Z.
- SIGMET 26E — CONVECTIVE: boundary within 100 NM of KTRI 88 NM. valid 2026-09-05 22:55Z to 2026-09-06 00:55Z.
- SIGMET 29E — CONVECTIVE: boundary within 100 NM of KCRE 74 NM, KMYR 83 NM. valid 2026-09-05 22:55Z to 2026-09-06 00:55Z.
- 38 of 55 retained hazard areas could not be related to any airport this page covers, by either test. They remain national-unfiltered: their geography is real but lies outside 100 NM of every airport tested, and nothing is claimed about where they are.
- Hazard feed record counts this run, unfiltered and national: SIGMET 23, G-AIRMET 25, CWA 7; overall feed state ok; feed states — CWA: ok, G-AIRMET: ok, SIGMET: ok. These are totals over the whole feed, not a count near KLZU, not a count along any route, and not a route assessment.

5 • New KLZU NOTAMs

This run keeps no snapshot of the previous run, so “new” cannot mean “changed since last time”. It is defined below as an FAA-published timestamp window, and the service-status scan reads the published text of every KLZU record so a status embedded inside a record of another category is not missed.

- Baseline for “new”: a KLZU NOTAM whose own FAA-published timestamp (last update, else issue, else effective start) falls within the 72 hours before this run's generation time (2026-09-05T22:57:58.514862+00:00). This run holds no copy of the previous run's NOTAM set, so this is a source-timestamp window and not a difference against an earlier run.
- KLZU NOTAM query state is AUTH_ERROR, so this run does not know the KLZU NOTAM picture. No new NOTAM count is stated: an incomplete query is not the same as no NOTAMs.

This restates evidence; it is not a recommendation, not an all-clear, and not a data outage. The decision surfaces are the planning gates and the ForeFlight cross-check below, read against the KLZU board and destination cards. Every line above restates a value shown elsewhere on this page.

⚠ **Pre-planning only — not an official weather briefing.** Verify an official briefing, METAR/TAF/GFA/SIGMET/CWA, NOTAMs, TFRs, runway conditions, fuel, W&B, performance, and personal minimums before flight.
